Display and Operating Elements

1. Driver 1 Activity button
2. Driver 1 Eject button
3. Driver 2 Activity button
4. Driver 2 Eject button

After opening the printer drawer, the data plate is visible showing 'e1 84'. Any printer paper used must also show on the reverse side "e1 84".
UTC Time (Universal Time Co-ordinated)

The digital tachograph and driver card saves all time entries (including manual entries) for mode activities in UTC time. Also, all time information on printouts is shown in UTC time.

UK and Ireland

### Converting Local Time to UTC:

**Local Time Set**

The symbol "●" appears after the time

![17:00● 0km/h 2241.7km/h](image)

**UTC Time**

The time appears without the symbol "●" i.e. when UTC = local time

![15:00 0km/h 2841.7km/h](image)

### Mode Activity Behaviour

**Whilst driving**

- for driver 1 activity “●”
- for driver 2 activity “▼”

**When the vehicle stops**

- for driver 1 activity “▼”
- for driver 2 activity “●”
Driver Card Log-in Procedure

1) Switch on the vehicle’s ignition (pre-release 1.2 version unit and ADR variant)
2) Insert Driver Card with the chip facing upwards and the arrow pointing forwards into Card Slot 1

3) Menu guidance after inserting driver card (with no manual entries):

- Greeting text; the set local time (09:00) and the UTC time (08:00) will appear for approx. 3 secs
- The driver’s name appears. A progress bar indicates that the driver card is being read
- The date and time of the previous card withdrawal will be displayed in UTC time for approx. 4 secs
- Manual Entries menu (Working away from the vehicle without the driver card inserted):
  - Select “no” if you do not want to add any mode activities
  - Select “yes” if you want to add mode activities
- Select Country at the beginning of the shift and acknowledge
- The standard display will appear
Driver 1 Card Log-off Procedure

1) Turn on the vehicle's ignition
2) Enter the corresponding activity; i.e. at the end of the shift to "end country"
3) Press the eject button for card slot 1
4) Menu guidance after ejecting driver card 1:

The driver's name appears. A progress bar indicates that the digital tachograph is transferring data to the driver card

Select Country at the end of the shift and acknowledge

Continues writing to the driver card

If you require a printout, select "yes" otherwise select "no" and then acknowledge

If a printout is selected, the display indicates that the printout has started

Continues writing to the driver card

The driver card is released and the standard display appears
Driver Card and Vehicle Unit Printout Operation

Main Menu – Driver 1 Card Printout
1) Turn on the vehicle’s ignition
2) Press \( \leftarrow \) button
3) Select the following functions step by step:

Please note that a Driver Card Printout for the current day can be selected when logging off with the Driver Card

Main Menu – Vehicle Unit Printout
1) Turn on the vehicle's ignition
2) Press \( \leftarrow \) button and press \( \downarrow \) twice
3) Select the following functions step by step:

Press \( \leftarrow \) to printout current day or Press \( \downarrow \) to scroll to a previous day
Date and time in UTC

Daily printout of driver activities from the Driver Card

Enforcement Officer card holder

Driver and Card identification

Vehicle identification including VIN, issuing Member State and VRN

Identification of the DTCO 1381

Most recent calibration including name of Workshop, Workshop Card identification and date of calibration

Most recent Control Check including date and time of control and type (i.e. printing)

Date of the activities shown and usage counter (i.e. 74 days that the card was used)

Time period that the card was not inserted and manual entries

Activities while card was inserted (* indicates a rest period of at least an hour)

Time period that the card was not inserted

Manual Entries

Example shown - Working away from the vehicle without the driver card inserted

Driver card was inserted on 18/10/05 at 08:00 with the following manual entries:
- Adding ½ hr \(\square\) on to the end of the shift 17/10/05 from 16:00 to 16:30 UTC
- Prefixing ½ hr \(\square\) and ½ hr \(\times\) on to the start of the shift 18/10/05 from 07:00 to 08:00 UTC
**Driver Cards - Legal Requirements**

**First issue** – Drivers should complete DVLA form D777B. The driver card is valid for 5 years and upon renewal the driver must apply not later than 15 days before expiry. The driver may hold one valid driver card only and is authorised to use only his own personalised driver card.

**Lost or Stolen Card**
If a driver card is lost or stolen, a replacement must be applied for within 7 calendar days. Stolen cards should be reported to the Police and DVLA. (DVLA tel no: 0870 8501074).

The driver must then at the start and end of the shift generate a daily printout from the digital tachograph and add personal information such as name and signature. Drivers’ may continue to drive without a driver card for a maximum period of 15 days or for longer if this is necessary for the vehicle to return to its premises.

**Malfunctioning card**
A Malfunctioning card should be returned to DVLA using form D777B

**Replacement card**
A replacement card must be collected from a DVLA local office or VOSA vehicle test station by the driver when it has been lost or stolen or exchanged. The driver should nominate where to collect the card and DVLA will write to the driver when the card is ready for collection. The driver must prove his identity by providing for example a passport or driving licence.

**Where a driver card is damaged, malfunctions, or is lost or stolen the driver must:**

(a) at the start of his journey, print out the details of the vehicle and shall enter onto that printout:

   (i) details that enable the driver to be identified (name, driver card or driver’s licence number), including his signature;
   (ii) any mode entries prior to taking over the vehicle

(b) at the end of his journey, print out the information relating to periods of time recorded by the recording equipment, record any periods of other work, availability and rest undertaken since the printout that was made at the start of the journey, where not recorded by the tachograph, and mark on that document details that enable the driver to be identified (name, driver card or driver’s licence number), including the driver’s signature.

**Tachograph checks during normal digital tachograph operation and mixed tachograph work:**

When using a vehicle with an analogue tachograph a driver must be able to produce:

- the record sheets for the current day and those used by the driver in the previous 28 calendar days;
- the driver card if he holds one, and
- any manual record and legal printout made during the current day and the previous 28 calendar days as required (i.e. when a drivers card has been lost, stolen or malfunctions)

When using a vehicle with a digital tachograph a driver must be able to produce:

- the driver card of which he is holder;
- any manual record and legal printout made during the current day and the previous 28 calendar days as required (i.e. when a drivers card has been lost, stolen or malfunctions)
- the record sheets for the current day and those used by the driver in the previous 28 calendar days during when he drove a vehicle fitted with analogue recording equipment.
Downloading Requirements

Driver Cards must be downloaded at least every 28 days and Digital Tachographs must be downloaded every 56 days, but in any case often enough to ensure that no data is lost. Downloading means copying the information from the Digital Tachograph and Driver Card – it does not delete it. The VU holds approx. 365 days and the driver card holds approx. 28 days of data, after which the oldest data is overwritten.

**IMPORTANT:** These brief instructions should not be regarded as a substitute for the DTCO 1381 instructions as prescribed by EU Regulation (EEC) no. 3821/85, Annex IB.

These instructions are for general guidance only and should not be regarded as a complete or authoritative statement of the law. Further information on legislation can be obtained from 561/2006 and 3821/85 (as amended) regulations.
